

SPORTS TURF NON-IRRIGATED MIX

- Drought tolerant
- Rapid development
- Dark green colour

APPLICATION RATE

1.5 kg/100m², 3 lbs/1,000ft²

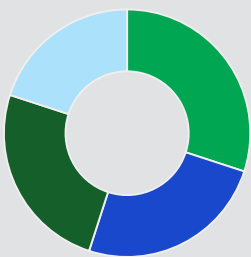

DESCRIPTION

SPORTS TURF (Non-Irrigated) is a proven mixture of varieties that have consistently performed on non-irrigated surfaces. Creeping Red Fescue contributes superior quality in colour, texture, spreading ability and offers resistance to Helminthosporium Leaf Spot and melting out. Perennial Ryegrass has been included for quick germination, winter hardiness, dark green colour, tolerance to summer stress and excellent mowability.

Developed for athletic fields and high traffic areas that require deep roots, wear resistance and toughness that only SPORTS TURF (Non-Irrigated) can deliver. Prefers full sun but will tolerate moderate shade.

MIX COMPONENTS

30%	Certified Creeping Red Fescue
25%	Certified Kentucky Bluegrass #1
25%	Certified Kentucky Bluegrass #2
20%	Certified Perennial Ryegrass
